

MAGMA 18KW SLOW COMBUSTION STOVE | DOUBLE SIDED

R29,895.00

The Magma 18kW , double sided, is a contemporary free-standing closed combustion fireplace designed to heat up large spaces.

MAGMA 18KW | WOOD BURNING STOVE | DOUBLE SIDED

A large, double-sided, wood-burning stove designed to heat up large-sized rooms and spaces quickly and efficiently.

The Magma is a contemporary fireplace with softened and rounded lines. It also has a wide viewing glass pane so you can enjoy the full view of the burning flames.

This model comes in several variations, namely: Single Sided version; Single Sided with a wood-

storage underneath; Double Sided with a wood-storage underneath.
The Magma's is a slow-combustion fireplace with superb heating capabilities.
It has a dual heating system - it has convection heating as well as radiational heating.

Install this double-sided fireplace in the middle of a large open space area to create a natural partition between your living and dining areas.
The Magma is a proudly South African product.

Note: Flue kit and installation are not included!

Stove Construction

The firebox, wood rack, and door are made of high-grade fabricated steel in a black finish. The interior is lined with high-strength slabs of natural stone.
